

US Army Corps of Engineers Civil Works Program Evaluation
Statement of Purpose

We in the US Army Corps of Engineers are sincerely interested in meeting the expectations of our customers and stakeholders. To determine how we are doing, we are conducting our annual Civil Works Program Evaluation.

The purpose of this survey is to assess the quality of products and services we delivered during the previous calendar year. The information collected will help determine which areas of services need improvement and where we are doing well. You have been selected to participate because you received services during the previous calendar year from the district that invited you to participate in the survey.

Participation in this survey is completely voluntary. Failure to provide all or any part of the information will not affect you or your project status. Should you choose to provide your name, title, and e-mail address, this information will be used only to contact you regarding your input. Survey results will be presented in aggregate form only and will not be attributed to any individual. Aggregate results will be published in the USACE Corporate Report and will be posted on the USACE Civil Works Program Directorate Homepage. The information collected will be managed in accordance with AR 25-400-2 records retention requirements and is subject to release under guidelines set forth in 5 U.S.C §552a and §552.

If you have any questions concerning this survey, feel free to contact Ms. Linda Peterson, Survey Manager at (251) 694-3848 or Mr. Mark Brabham, Webmaster (251) 441-5032.
