The Former Memphis Depot Five-Year Review Community Notification

The Department of Army is conducting a Five-Year Review under CERCLA for the former Memphis Depot, located adjacent to Airways Blvd. and Dunn Ave., to determine whether the selected remedies remain protective of human health and the environment. The selected remedies for soils contaminated with metals, hydrocarbons and volatile organic compounds were excavation, transportation and off-site disposal, and soil vapor extraction. The selected remedies for groundwater contaminated with chlorinated volatile organic compounds were enhanced bioremediation, air sparging, natural attenuation and long term monitoring. All remedies have been completed or are currently operating. In addition to environmental clean-up, site-wide land-use controls have been implemented to prevent residential land use, daycare facilities, drilling and groundwater use, and to control site access. Additional site information is available at the information repository in the Memphis Depot Business Park at 2245 Truitt Street; please call (901) 774-3683 to make an appointment. You may also find information online at: <http://www.epa.gov/region4/superfund/sites/fedfacs/memdedpttn.html>

The Department of Army invites comments from the community on the protectiveness of the selected remedies for the former Memphis Depot through May 31, 2012. The final report for the Five-Year Review will be completed and made available to the public by January 31, 2013.

To request additional information or to provide a comment, please call the Community Involvement Line at (901) 774-3683 or email denise.cooper@hdrinc.com.
